

REMARKS

In response to the Election/Restrictions sections (sections 2-3) of the Restriction Requirement, the claims in Species I have been elected without traverse. In this regard, claim 1 has been amended to incorporate the feature of dependent claim 4 which specifically enumerates that the relative movement is rotational.

Furthermore, claim 1 has been amended to include the feature of dependent claim 6; namely, that the input key is actuable in an access perpendicular to the plane of the substantially planar body. As a result, dependent claim 6 is also canceled.

Claims 2-3 and 7-17 all ultimately depend from amended claim 1 and therefore all include the feature of Species I; namely, that it pertains to a key with translational movement.

Independent claims 19 and 22 have been amended in a manner similar to claim 1 and therefore independent claims 19 and 22 also relate to Species I. Dependent claims 20 and 21 which depend from claim 19 and dependent claim 23 which depends from claim 22 also relate to Species I in view of their dependency.

Amendment to claims 2, 3, and 7-17 has also been made for insuring proper antecedent basis for terms used therein. No new matter is added.

The present application as amended is believed to be in condition for examination and such action is earnestly requested.

The undersigned respectfully submits that no fee is due for filing this Response. The Commissioner is hereby authorized to charge to deposit account 23-0442 any fee deficiency required to submit this paper.

Respectfully submitted,

Dated: November 15, 2010
